delusions nor hallucinations, not psychotic, not dangerous, not actively suicidal but has passive thoughts that he may not be a goof influence on his kids, affect restricted but appropriate.

6. Other symptoms

Does the Veteran have any other symptoms attributable to PTSD (and other mental disorders) that are not listed above?
[ ] Yes [X] No

7. Competency

Is the Veteran capable of managing his or her financial affairs?
[X] Yes [ ] No

8. Remarks, (including any testing results) if any:

VA and VBMS records reviewed.

Marine Corps veteran continues to suffer from moderately severe PTSD and moderately severe Major depression, not fully responsive to mutiple medications and therapy, the mental condition affecting all aspects of his life---personal, marital, social, educational and occupational. Since his last exam he is no better. The PTSD and Depression symptoms overlap and cannot be separated from each other. The PTSD and Depression aggravate each other.
