[REDACTED]  
211 East Calhoun St.  
Whiteville, NC 28472

We have received and very carefully reviewed your claim for compensation benefits. To establish entitlement to this benefit, the evidence must show that you have a disability incurred in or aggravated by service, in line of duty, and it must be 10 percent or more disabling. Regrettably, the evidence, including your service records and a report of your recent physical examination, does not meet these requirements. Service connection is established for your chronic low back pain evaluated as 0 percent disabling. You are entitled to necessary treatment by the Veterans Administration for this condition. Application for necessary treatment can be made at the nearest Veterans Administration office. If you apply in person, you should present this letter; if by letter, please include your Social Security number which is now also your Veterans Administration claim number.

Service connection is denied for tension headaches, a fractured right wrist, and a fractured right clavicle as these disabilities were not incurred in or aggravated by your military service. Residuals of viral hepatitis are not shown on the last examination. Your nervous condition is not a disability under the law for which compensation may be paid.

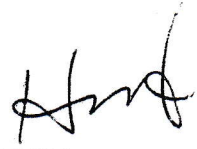

Be assured that every possible effort was made in your case, with the hope that you might be granted the benefits you wanted. However, the Veterans Administration is bound by legislation, passed by Congress for the benefit of all veterans. The evidence in your case, when considered within this framework of controlling law, was not strong enough to sustain a favorable determination.
